

Robert S. Sabellico

July 20, 1932 - January 19, 2025

Robert S. Sabellico

Loving husband and father. Always there to provide help, and support to his family, without even being asked.

His kindness, generosity, and patience were unprecedented.

He worked for the MTA, starting as an engineer. He moved up the ladder to a position supervising a large staff.

He also used his expertise as an engineer and woodworking skills with building furniture. He created a beautiful outdoor furniture set. The pieces of outdoor furniture included 2 beautiful, adjustable lounge chairs with wheels to easily move them around the yard as desired for anyone who wanted to use them. He built a picnic table, and benches for the table. His family enjoyed many barbecues using that furniture. Also the very comfortable lounge chairs were used often for his family to enjoy their backyard. We can go on and on with all of the things he built to improve the joy, and beauty of the things he did to improve the quality of his family's lives.

In addition, he enjoyed, and helped with landscaping his family's front and backyard, helping his wife with making a garden including tomato plants, and a fig tree. Also with helping with creating enclosures for his wife's flower beds.

His creativity was also seen in the beautiful walkway, and patio making all of the paving stones perfectly aligned.

He also made the inside of his family's home more beautiful.

Every weekend he was doing something to make his family's life better, and more comfortable.

We can go on with all of the things he built to improve his family's joy, and beauty of the things he did to improve the quality of his family's lives.

He also had a great sense of humor, making dinners and holidays unforgettable.

He will be greatly missed, but is now with his wonderful wife, his family, and friends who have passed before him.
